What is the Industry Sub-Committee?

Committee's function

The Industry Subcommittee was formed during the National Homebrewers Conference of 2010.

The committee's primary goals are to foster better communication between the AHA and industry entities, as well as provide resources, assistance, and guidance to the AHA based on concerns brought forward by said members of the homebrewing industry.

2012/2013 Activities

1. Expanded programming for the Industry Workshop (formally called Retailers Roundtable) and increased attendance.
2. Review and develop questions for the annual industry survey
3. Exploring the idea of creating an industry trade organization of some kind - perhaps through the AHA.

Questions/Suggestions

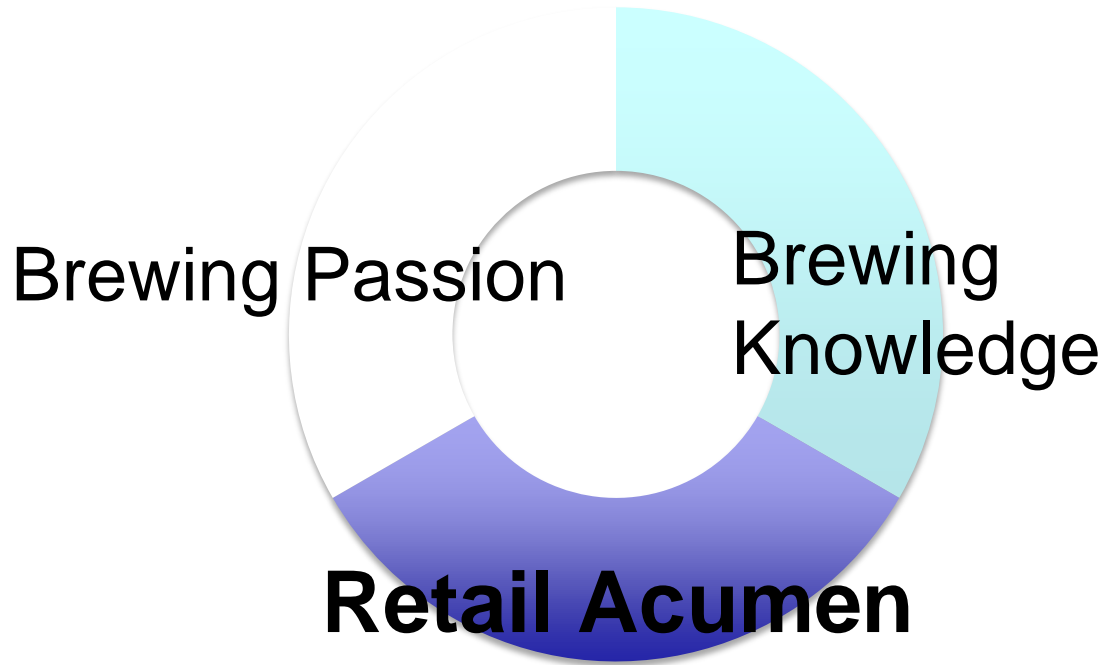

Retailing Like A Retailer

Necessary ingredients for a successful homebrew shop

Lesson One, Two Things!

1. When in doubt, go shopping!

2. Two-Tier Pricing Makes \$\$\$!

Embrace Retail!

- Consumers love shopping!
- Shoppers are conditioned by big stores!
- Shopper behavior is predictable!

Self-Evaluation

No, No, and No I don't!

- I have a hard time **not** offering a discount to my friends.
- I feel guilty when somebody spends more money than I would on something.
- I feel bad offering the overly-expensive version of a product.

Consumer Thought Process

- What is it?
 - Packaging
 - Positioning
 - Adjacency
 - Value
- Is it for sale?
 - Standard offer (price)
 - Special offer (price)
 - Exclusive offer (price)
- Value Purchase
 - Saves time
 - Saves money
 - Increases quality
 - Makes me happy
- Impulse Purchase
 - I didn't know I needed that
 - Limited product offer
 - Limited pricing offer

*Programmed Purchase

** Complimentary Purchase

Non-Shelf Inventory

- Displays
 - Communicates a special offering
 - Offer the best value for the price
 - Yes, on sale, but sales are planned
 - Blended margin of on-vs.-off sales weeks
 - AKA, 2-Tier pricing

Two-Tier Pricing

- Frontline Price: \$17.99
 - 12 weeks
 - 100 units per week, 1200 units per year
 - Margin = 50%
- Sale Price: \$14.99
 - 36 weeks, 3 on (frontline), 1 off (sale)
 - 300 units per week, 10,800 units per year
- Blended price: \$15.29
 - $\$14.99 \times 10,800 = \$161,892$
 - $\$17.99 \times 1,200 = \$21,588$
 - Total: $\$183,480 / 12,000u = \15.29

Shopping Carts

- Without them
 - “please only buy what you can carry”
- Selecting a cart is a commitment to spend \$\$\$

Destination Items

- Safeway – Milk in the back corner of the store
- Homebrew Shop – grains at the back, longest walk

- Goal: to get customers to walk and shop every aisle, parting with their money as they “consume” **value** and **service** from your offerings

Brand and Product Ribboning

- Shelf-Ribboning = Vertical, not horizontal
- Higher priced items are to be reached up for
- Lower priced items are to be reached down for
- Put the highest product up top, the middle on in the middle, the low end offering on the bottom.
- But I don't carry a low end item.... Ah-Hah!
- Know the Law of Compromise Effect!

Loyalty Programs

- **Gamification** of buying
 - Introduction of game-like challenges and rewards in a non-game environment to improve engagement and participation
- Loyalty = 3rd tier pricing!
 - Frontline Price
 - Sales Price
 - Member Price (exclusive)
- Acquisition of shopper demographics

A Clean Store

You won't notice the gradual dirt and dust build up over time, but your customers will!

Homework

- Stand in your shop (blindfolded) for 10 minutes.
 - What do you hear?
 - What do you smell?
 - What are your customers doing before they check out?
- Go across the street from your store and sit in a chair for 30 minutes.
 - Predict what customers will purchase before they go in?
 - Profile their brewing needs?
 - Then check receipts to see what they did purchase.
 - Ask yourself what they ***didn't*** purchase and why?

Lesson One, Two Things!

1. When in doubt, go shopping!

2. Two-Tier Pricing Makes \$\$\$!
